

What is Cataract?

when your eye's natural lens becomes cloudy. Proteins in your lens break down and cause things to look blurry, hazy or less colorful.

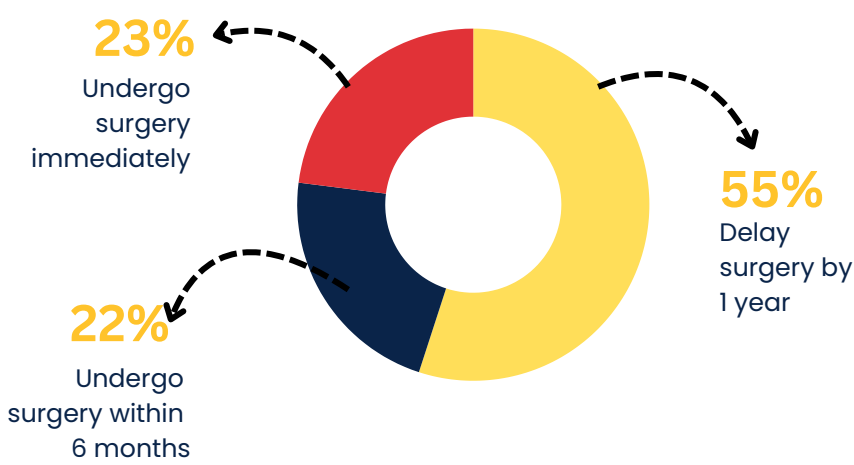

Symptoms of Cataract

- ▶▶ Having blurry vision
- ▶▶ Seeing double or a ghosted image out of the eye with cataract
- ▶▶ Being extra sensitive to light (especially with oncoming headlights at night)
- ▶▶ Having trouble seeing well at night, or needing more light when you read
- ▶▶ Seeing bright colors as faded or yellow instead

Treatments of Cataract

Surgery is only solution. Advanced technology like the phaco emulsification method can be used to perform the surgery. As there is no discomfort during the surgery, the patient is discharged home immediately.
