

# What is Retinal Detachment (RD)?

Retinal detachment happens when the retina pulls away from its normal position at the back of the eye.

## Am I at risk for RD?

## **There are various factors that increase risk:**

**Eye injury or Trauma**

**High Myopia (Nearsightedness)**

**Cataract Surgery History**

**Congenital Malformations**

**Vitreous Degeneration**

**RD In The Other Eye**
