

NABH ACCREDITED

*Struggling with  
blurred vision  
caused by  
cataracts?*

*Choose your IOL wisely*

# What is IOL?

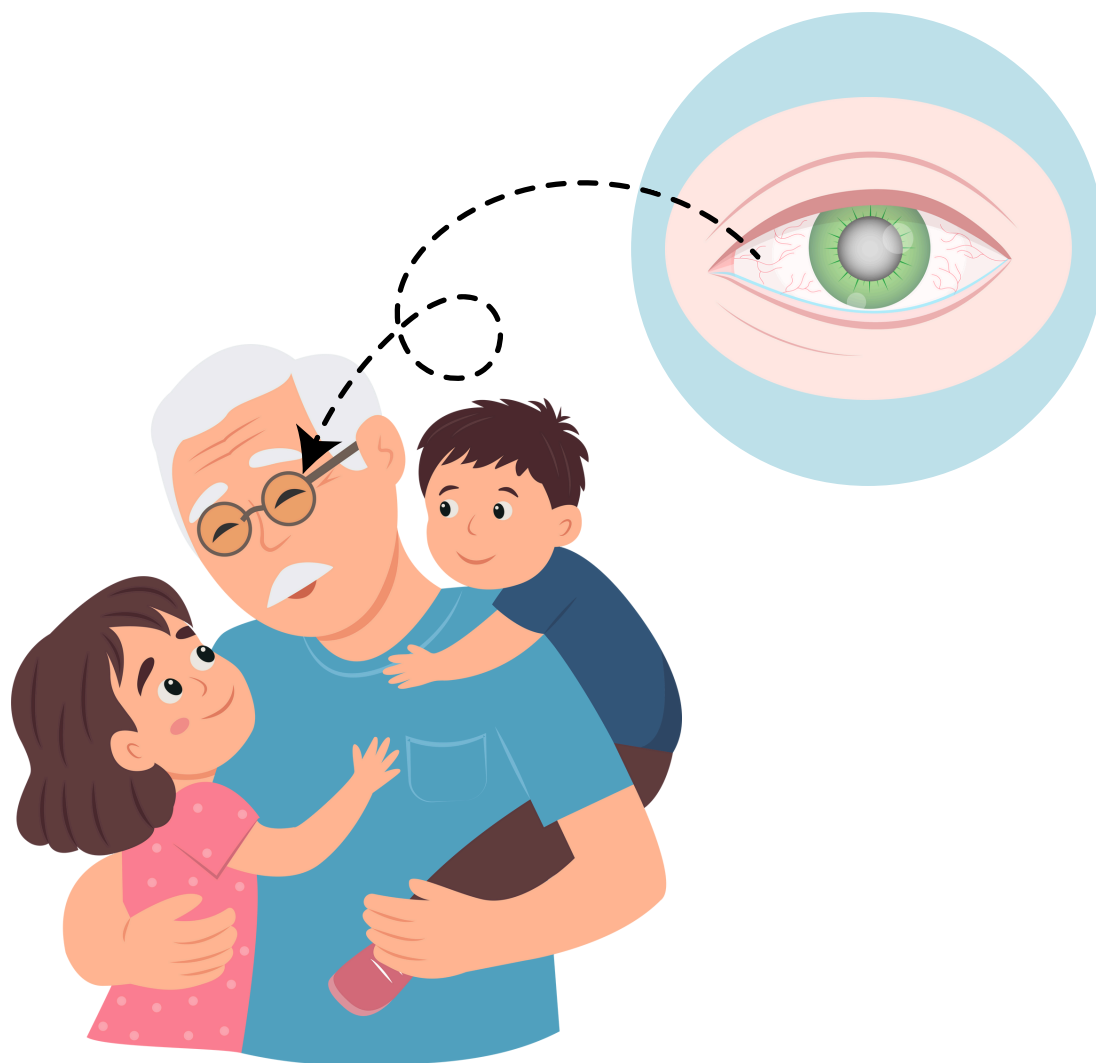

It is an artificial lens

Used to replace the eye's natural lens

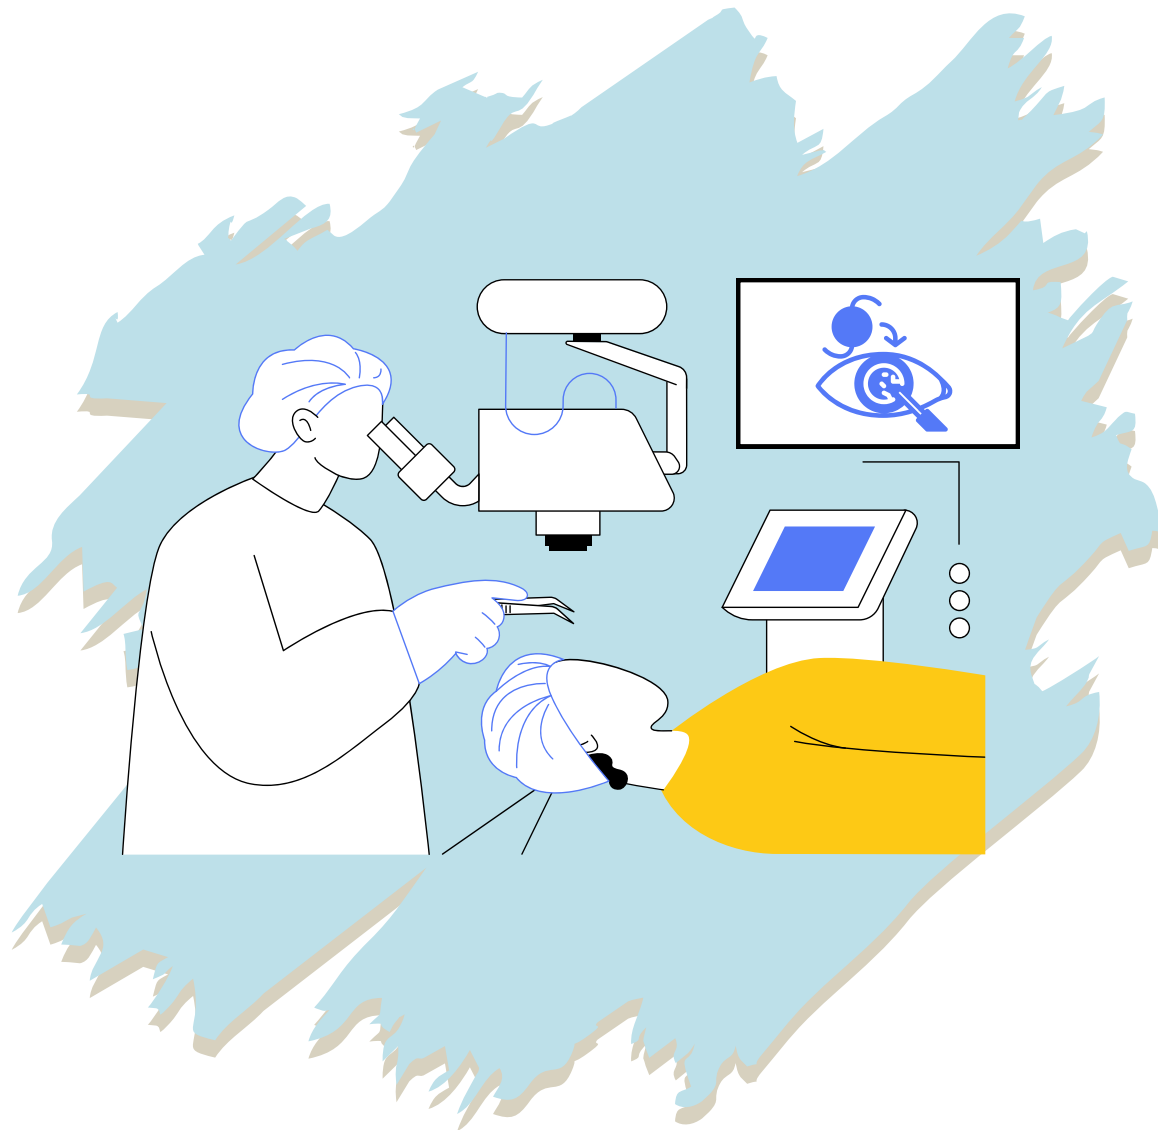

Helps regain sharp vision.

# When is an IOL used?

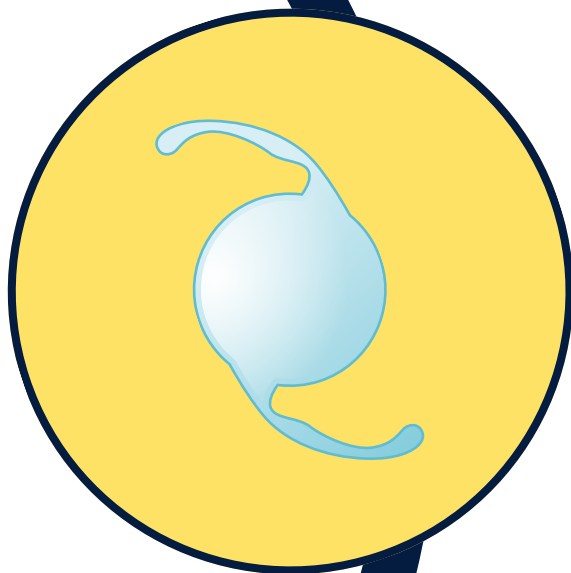

**Cataracts cause the natural lens to become cloudy, leading to blurred vision.**

# When is an IOL used?

**Natural lens has to be removed  
and replaced with IOLs**

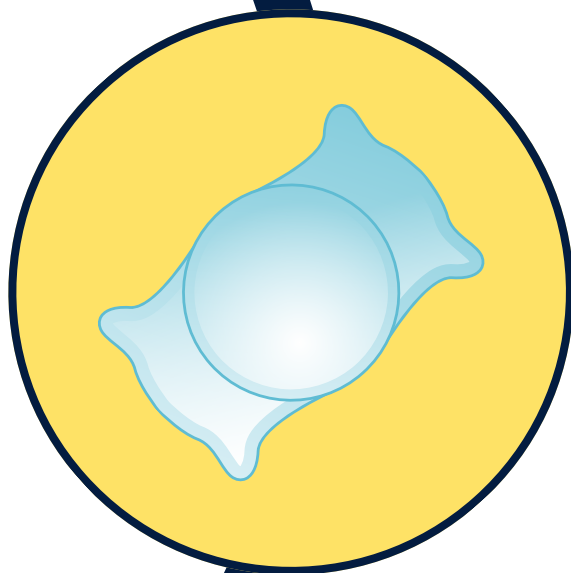

# Types of IOLs

## Monofocal IOLs

Provide clear vision  
at one fixed distance  
(near or far).

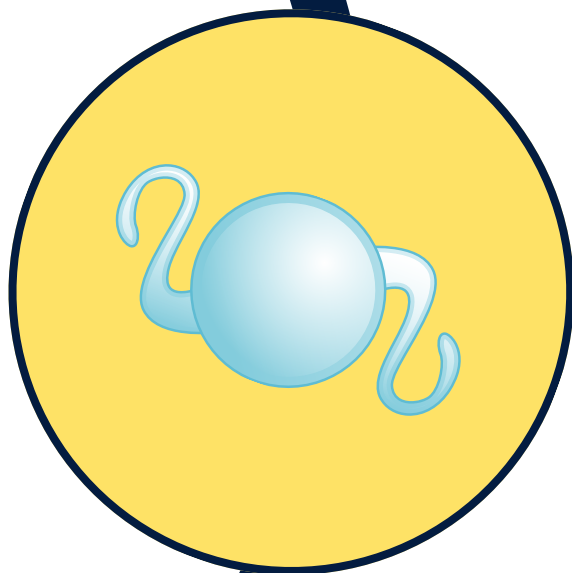

# Types of IOLS

## Multifocal IOLs

Correct vision at multiple  
distances  
(near, intermediate, and far)

# Types of IOLs

## Toric IOLs

Correct astigmatism, in addition to addressing cataracts.

# Don't hesitate to take action your eye health is a priority
